Delivery **Thu 12. Nov - Fri 13. Nov 2026**

Product information

Simply ingenious - ingeniously simple!

In contrast to the plastic carriers of the Lansky stones, the blue Belgian Whetstone (BBW) is glued to a milled aluminum carrier with a rail profile.
is glued onto a milled aluminum carrier with a rail profile.
The lettering has been lasered, and a knurled screw provides a good grip.
The grinding surface of the blue Belgian chunk measures 100 x 17 mm.
It is therefore slightly wider than the Lansky diamond grinding surfaces (101.7 x 12.7 mm).
Grit size: 6000

The Belgian chunk can be used with water.
Use the Belgian chunk for the finish (last stone) of your knife. The stone polishes the cutting edge without leaving a burr.
The service life of the sharpness is extended by a factor of 7-10!

This product is only the Belgian chunk on the aluminum carrier.
You do not purchase a guide rod or a complete Lansky sharpening system.
