Product information

Blue Belgian sharpening stone for the Lansky set

Simply brilliant - brilliantly simple!

Unlike plastic carriers of the Lansky stones of blue Belgian Brocken (BBW = Belgian Blue Whetstone) is bonded to a machined aluminum carrier with rail profile. The font was lasered, as there's a handy clamping screw. The grinding surface of the blue Belgian stone has the dimensions 100 x 17 mm, so it is slightly wider than that of the Lansky diamond grinding surfaces (101.7 x 12.7 mm).

The Belgian sharpening stone can be used with water.
Insert the Belgian stone for the finish (last stone) of your knife. The stone polishes the edge without burrs left on. The lifetime of the sharpness is extended to the 7-10 times!

This product is only to the Belgian stone on the aluminum support. You acquire no guide rod and not a complete Lansky sharpening system.
