Belgian chunk for pruning shear , natural combo stone - Grindstone Deluxe
Dimensions: 3.93"x0,63"x0,59"

Grain: Belgian chunk yellow 8000
Grain: French sandstone gray 1200

Who knows the situation finger-thick branches just squeezed through the secateurs and no longer cut.
Gardening can only be accomplished with great effort from muscle strength.

The best cutting tool does nothing without sharpness!

Our natural combination stone specially developed for secateurs impresses with the following advantages.
The handy and compact stone size enables grinding or sharpening without removing the blade.
Both natural stones are simply used with water.
Minor injuries to the cutting edge can be corrected with the rough French natural stone.
Blunt garden shears get the basic sharpness again with the sandstone.

Your Belgian whetstone removes the burr on the cutting edge and keeps the sharpness on the edge.
Use the fine Belgian stone to keep your sharpness on the secateurs.

Our recommendation:
Maintaining sharpness (fine yellow stone) is more important than grinding again and again (coarse gray stone)

Your pruning shear natural combi stone is delivered in a cotton bag with brochure, sharpening instructions and certificate of authenticity.
