Coticule Standard Bout 3: 23-27 cm²

Informazioni sul prodotto

The Coticule □ Selected□ consist of a Coticule top side of 7 to 10 mm and a bottom side of unusable black shist. The Coticule stone has between 6000 and 8000 grits and contains 30 to 42 % garnets, which results into the stone being very fast at whetting knives. The Coticule has a yellow-white colour with red and green shades from time to time. The Coticule □ Bout□ has irregular shapes, depending on how it is cut out of the rocks. There is no quality difference between the □ Selected□ and the □ bout□ , only the shapes differ. "Selected" provides a homogeneous stone while "Standard" shows cosmetic defects or natural colourisation.
